PROJECTS

> NorthBank Share — Arsenal Supporter Transit & Ticket Platform (June 2026)

Built a peer-to-peer carpool and ticket exchange platform using vanilla JavaScript and Tailwind CSS, featuring an interactive 3D stadium map, dynamic seat grid, CSS-animated tearable ticket system with unique token generation, and CSV manifest export.

> AirBoard — Draw in the air with your hands (June 2026)

Built a real-time hand-tracking whiteboard using MediaPipe Hands and Canvas API, running client-side at 30fps with 5 gesture controls, dual-canvas glow rendering, and a particle physics engine in vanilla JavaScript.

> AeroFocus — Focus Timer (May 2026)

Built a focus timer web app using vanilla JavaScript with a 4-screen state machine, CSS parallax animations, Web Audio API ambient engine sound synthesised from a sawtooth oscillator, and a real-time terminal logger. Zero dependencies.

> dishaumeshaiah.com — Personal Portfolio (April 2026)

Built a personal portfolio from scratch using HTML, CSS and vanilla JavaScript featuring scroll-triggered animations, dark/light mode toggle, glassmorphism UI elements and a neon visual identity system. Zero frameworks.

SKILLS

- Programming: Python, JavaScript, HTML, CSS, SQL
 - Technologies: MediaPipe, Canvas API, Web Audio API, Chrome Extensions API, REST APIs, Tailwind CSS, React.js, Git, GitHub, Spring Boot, Apache Kafka, Docker
 - CS Core: DSA, OOP, Operating Systems, Computer Networks, Database Systems, Cybersecurity
-

EXPERIENCE

> Palantir Technologies — Winter Tech Fellowship (Dec 2024 – Jan 2025)

Completed Palantir's Winter Tech Fellowship, an intensive project-based programme applying core software engineering fundamentals to real-world problem sets.

> Stanford University — Summer Intern, Code in Place (Apr 2024 – Jun 2024)

Completed Stanford's Code in Place, an introductory programming course covering control flow, functions, conditionals, arrays, lists and dictionaries, and graphics-based Python programming, culminating in a significant final implementation project.

> Google — EMEA Cloud Student Programme (Oct 2025)

Selected for Google's EMEA Cloud session led by the Manchester-based team to explore the intersection of AI and software architecture; built a functional game using Google AI Studio within an accelerated timeframe. Ranked 11th overall in the EMEA Cloud Student Programme.

> Qiskit Global Summer School — IBM (Jul 2026)

Selected for IBM's Qiskit Global Summer School, an intensive programme covering quantum computing fundamentals and quantum algorithm development.

VOLUNTEERING

> The Second Table — Founder (2020 – 2025)

Founded a surplus food redistribution platform at 15, managing 20+ volunteers and connecting local businesses to communities, serving ~50 meals every weekend and organising fundraising events to sustain operations over 5 years.

> Adobe — Student Ambassador (Oct 2025 – May 2026)

Ran 6+ technical workshops reaching 30-40 students per session, driving Adobe Creative Suite and Express adoption across student organisations through outreach events.

> Thinking About Thinking — Ambassador (2026)

Part of a global network working across AI, neuroscience, mathematics and scientific discovery, helping host seminars and conferences. Upcoming: AE Global Summit on Open Problems for AI 2026.

EDUCATION

- BSc (Hons) Computer Science — Aston University (First Class Honours) 2025-2028
- Mathematics for Machine Learning — Imperial College London: Linear Algebra (98%), Multivariate Calculus (94.75%) 2026
- GWC Summer Immersion Project — Girls Who Code 2022
- Summer Course — Brown University 2022
