PROJECTS =

- **NorthBank Share — Arsenal Supporter Transit & Ticket Platform** *(June 2026)*
Built a peer-to-peer carpool and ticket exchange platform using vanilla JavaScript and Tailwind CSS, featuring an interactive 3D stadium map, dynamic seat grid, CSS-animated tearable ticket system with unique token generation, and CSV manifest export.
- **AirBoard — Draw in the air with your hands** *(June 2026)*
Built a real-time hand-tracking whiteboard using MediaPipe Hands and Canvas API, running client-side at 30fps with 5 gesture controls, dual-canvas glow rendering, and a particle physics engine in vanilla JavaScript.
- **AeroFocus — Focus Timer** *(May 2026)*
Built a focus timer web app using vanilla JavaScript with a 4-screen state machine, CSS parallax animations, Web Audio API ambient engine sound synthesised from a sawtooth oscillator, and a real-time terminal logger. Zero dependencies.
- **dishaumeshaiah.com — Personal Portfolio** *(April 2026)*
Built a personal portfolio from scratch using HTML, CSS and vanilla JavaScript featuring scroll-triggered animations, dark/light mode toggle, glassmorphism UI elements and a neon visual identity system. Zero frameworks
- **Neon Flow Pro — Finance Tracker** *(April 2026)*
Built a Chrome Extension using Chrome Extensions API and Chrome Local Storage API that intercepts checkout pages and sends real-time desktop alerts when spending exceeds daily limits, with CSV export for habit tracking

SKILLS =

- **Programming:** Python, JavaScript, HTML, CSS, SQL
- **Technologies:** MediaPipe, Canvas API, Web Audio API, Chrome Extensions API, REST APIs, Tailwind CSS, React.js, Git, GitHub, Spring Boot, Apache Kafka, Docker
- **CS Core:** DSA, OOP, Operating Systems, Computer Networks, Database Systems, Cybersecurity

EXPERIENCE =

> J.P. Morgan — Software Engineering Job Simulation *(June 2026)*

Completed a simulation integrating Kafka into a Spring Boot microservice, implementing transaction validation with Spring Data JPA, REST endpoints for balance queries, and Maven test suites for reliability across message ingestion and database operations.

> Thinking about Thinking — Ambassador *(June 2026)*

I'll be part of a global network working across AI, neuroscience, mathematics and scientific discovery. The programme includes private seminars, in-person events and ongoing collaboration through the ThAT Fellowship Hub. Upcoming: 🇬🇧 AE Global Summit on Open Problems for AI 2026

> Adobe — Student Ambassador *(Oct 2025 – May 2026)*

Ran 4+ technical workshops reaching 20-30 students per session, driving Adobe Creative Suite adoption and improving digital literacy across campus. Led creative outreach events expanding Adobe Express usage among student organisations.

> Google — EMEA Cloud Student Programme *(Oct 2025)*

Selected for Google's EMEA Cloud session in Manchester; built a functional game using Google AI Studio within an accelerated timeframe, exploring the intersection of AI and software architecture.

> The Second Table — Founder *(2020 – 2025)*

Founded a surplus food redistribution platform at 15, managing 20+ volunteers and connecting local businesses to communities, serving ~50 meals every weekend and organising fundraising events to sustain operations over 5 years.

EDUCATION =

- BSc (Hons) Computer Science (Achieved a First) 2025-2028
- Qiskit Global Summer School 2026- IBM July 2026
